

CARBIDE-TIPPED CIRCULAR SAW BLADE PRICE LIST

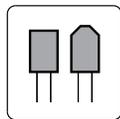

W.D. Quinn Saw Co. is the nation's premier provider of saw blade sharpening services. Our carbide tipped saw blade sharpening services include blade inspection, ultrasonic cleaning and polishing. Precision CNC grinding of the tooth face and tops using our robotic Vollmer CHD270 grinding center with ultrafine diamond wheels under intensive flood cooling ensures the optimum cutting edge quality and consistent tooth form accuracy.

Any broken tips are replaced and precisely ground to match the existing tooth form and kerf (at additional charge).
